

# COMPANY PROFILE

# missions and vision

**We are on a mission** to become the global market leader in the development, production, and sale of high-quality products for environmentally friendly cleaning.

**We strive** to create sustainable products for long-term use that provide exceptional results and support the development of the Circular Economy.

**We are on a mission** to reduce 95% of the chemical footprint when it comes to cleaning, sanitation, and disinfection, globally.

**By replacing** chemical products with an eco-friendly alternative, we can reduce up to 95 % percent of CO<sub>2</sub> (carbon dioxide) emissions formed as a consequence of cleaning and disinfection supplies and plastic materials production.

**We are on a mission** to improve the health and quality of life and reduce the allergies and diseases of the population on Earth.

**Cleaning with EV** is a completely natural method of deep cleaning and sanitizing, suitable for use around newborns, people with allergies and health problems.

## Vision

**Changing the future and standards of cleaning by introducing a new and better way of sanitation to every household and business.**

# our values

Our internal culture revolves around helping and supporting each other to become better at what we do and achieve our goals together.

We don't shy away from sharing knowledge and know-how, instead encouraging an atmosphere of constant upskilling and learning. This allows each one of our customers and staff to benefit from a depth and breadth of knowledge, and from learning from people from all walks of life with a myriad of different perspectives.

## Integrity

1

The trust of our customers and partners are always our priority. That's why we are doing everything possible to deserve and protect it by putting their needs first and exceeding their expectations.

## Reliability

2

A guarantee that every product of our range is trustworthy and perform consistently well.

## Loyalty

3

We use the highest quality materials and the most innovative technologies to ensure that our customers and affiliates will be more than satisfied investing in our products. Also, we will always support our distributors and partners, creating an atmosphere of loyalty and honesty.

## Adaptiveness

4

As a company willing to make the bold choice and push forwards towards innovation, we value people that are able to recognize potential opportunities, take risks and look for creative solutions.

## Persistency

5

We don't give up easy and we always strive to take action, reach our goals and push ourselves to be our best.

# our locations

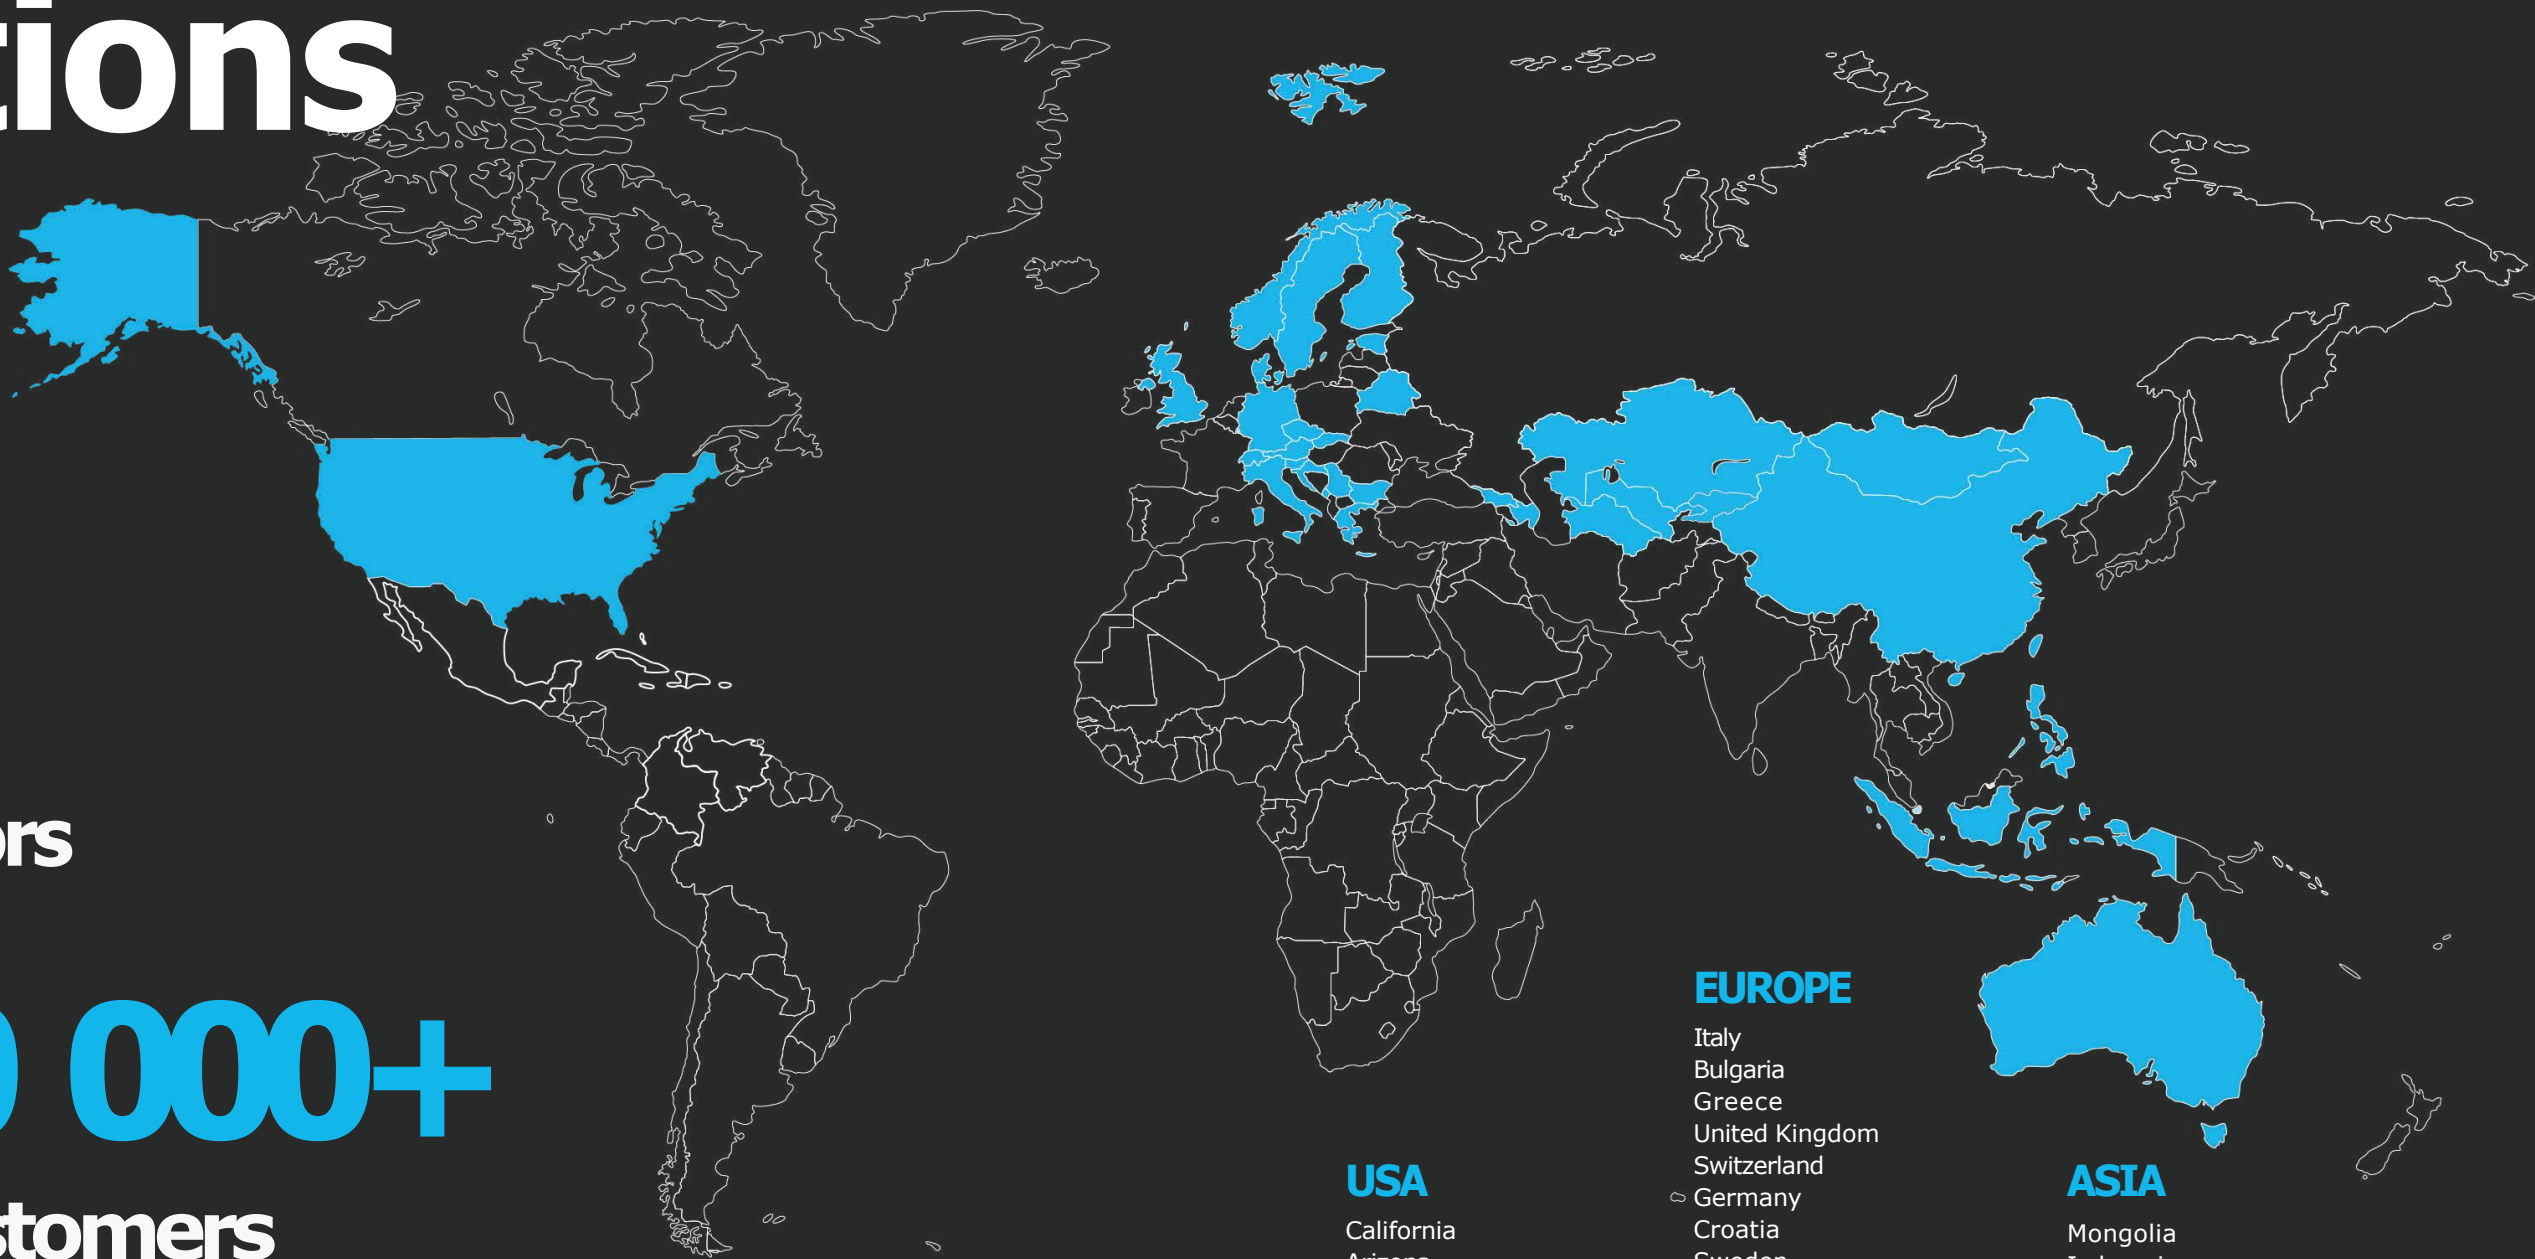

40+  
countries

40+  
EV distributors

5 000 000+  
satisfied customers

The head office of the company is located in Sofia, Bulgaria. A team of specialists and professionals takes care of the day-to-day support of all the distributors worldwide. In addition to a high-quality product, we offer a full package of services: marketing materials, trainings, technical support, integration, and a comprehensive vision of work structure to our distributors and partners.

Since the establishment of E V International Ltd., we have built a working marketing model that allows our partners to start their businesses with very little investment. We dare to say that we are one of the world's fastest-growing direct marketing companies for dry steam cleaners, and as such, we are adaptive to all the challenges of this dynamic work environment.

# the factory

## Work in process

The production of the EV cleaning systems is based in one of the largest steam cleaner factories in Europe, with more than 40 years of experience.

The factory in Milan, Italy covers an area of 13 000 sq. m. (42 651 sq. ft.), with internal design, mold construction, 29 machines with additional equipment for injection molding, and 4 000 sq. m. (13 123 sq. ft.) for assembling lines where we are able to produce more than 5 000 units a week. The production is entrusted to experienced personnel that works with high quality and reliable materials to achieve the best possible results.

The process undergoes strict quality control. First, we verify the incoming prime materials. Then, we have additional control during the assembling process. In our performance test area, we are making sure that every part of the unit is working properly and safely according to the international standards. Another quality test is executed in our "life test" area where units are stressed and tested for years and years, eliminating all possible problems. That allows us to continuously improve the quality and performance of the EV unit.
